25X1A

25X1X 1. 30 to 40 jet fighters at the Wiener Neustadt airfield. The jets are characterized by a very high rudder, which rises smoothly from the main body of the plane. The horizontal rudder is set rather high up, and extends backwards farther than the vertical one. The wings are low, and are swept back. The planes have two small wheels in front, and one in the rear. On the top of the plane there is a slight oblong protrusion, not higher than a man's head. Looking at the plane from the rear, there is a hole visible. Two of the planes, observed from a distance of 600 yards, were painted a light bluish gray. The other planes, seen from a much greater distance, were of a darker color.

2. On the border of the airfield there was a closed truck, sheltered by a wooden shed, with another wooden hut next to it. There was an antenna beside the truck, consisting of a pole about seven feet tall with wires leading from the top to the ground.

3. The airport seemed to be in poor condition. There was a shortage of hangars, and there were only a few buildings which can be used as workshops, storage facilities, etc. There was no servicing going on at the airport, nor was there any traffic.

4. The airport is not surrounded by a fence, nor do there seem to be any guards. There are, however, signs in German prohibiting entrance.
